PIT BIKE MOTARD : MTR racer r on road

MTR racer r on road

MTR RACER R is an all-rounder of asphalt.

MTR surprises us with this new look much more aggressive than in past campaigns and with numerous improvements. This version already counts in the cycle part as it is the opening of half degree in the direction of previous campaigns and now also includes harder springs of forks. From MTR they have created the perfect combination in the part cycle and suspension so that to go fast is not a question of changing pieces in the pit bike, but of buying this marvel, pouring gasoline and enjoying in the go karting time at each turn. A pit bike very docile to drive, not aggressive, fast in curves and very stable, which gives us a lot of safety at every turn and makes us feel true drivers. This year with blue aluminum leather covers. Get the highest quality with the best price of all brands.

This year the RACER R model has been loaded with candy. These include:

Short aluminum shift lever in blue color
Cutting boards
Kmc 420 gold color chain
Blue cnc chain tensioners
Accelerator and clutch cables in blue
Protaper cuffs for easy grip
Cap aluminum deposit in blue color
Double oil radiator
New carbon-tipped silencer

If you get on a RACER, you do not have another pit bike, you are as old as you are, have the height you have.

Cushioning:
630mm hydraulic forks marzocchi replicas, new harder springs, with 37mm inner bar. Adjustable in compression and extension, adjustable both separately in each bar. DNM shock absorber MT-HRC, adjustable in compression, extension and preload of spring of 800lbs and 325mm of lontigud.

Chassis: More open chrome half-grade steel, with extra long straight overhang of 440mm.
Many still think that a good pit bike biker should be swinging cantilever, but they are totally wrong. Just get the right

configuration so that everything fences on wheels, this double swingarm gives us great rigidity and aplomb in the rear train.

Motor MTR Z 155 V01.
Motor MTR Z 155 in its latest version 01 with internal oil filter and light magnetic plate, forget about the competition that uses the most economical version V02. The Z155 engine adds an extra torque in low and medium speed thanks to its lightweight magnetic plate and its perfect internal measures that help to get better out of the curves when opening gas. A powerful motor cooled this year with DOUBLE RADIATOR for more effective cooling !!

Brake Kit: Large double piston with larger brake discs, 220mm front and 190mm rear.

Tires.
Alloy wheels LIGHTS of 5 sticks of less weight and an exact measurements for the motard more than contrasted, 3.00 "rear and 2,5" the front. Includes unilli tires for use in circuits.

Design. Our incredible design MTR racer r.

RACER: The object of desire. When the piles, you do not stay another pit bike, and we do not say it, they say it all the one that rises to her.

Name	Reference	Price Inc. Tax
Tires With PMT	RACR016PMT	1.821,00 €
Tires Without tires	RACR016	1.675,00 €
