Dimensions: 80cm from seat to floor; 99cm from the handlebar to the ground; 123.5cm between axles of tires.

Cushioning:
710mm hydraulic forks marzocchi replicas, with 37mm inner bar. Adjustable in compression and extension, adjustable

both separately in each bar. DNM shock absorber MT-BAG, adjustable in preload and rebound with spring of 800lbs and 315mm of lontigud.

Chassis: Chrome steel, with extra long straight overhang of 440mm.
This year, MTR goes beyond presenting a new double-chassis chassis called BEST FRAME improved with respect to its economic version. A chassis lighter, less heavy and at the same time rigid, which makes us enjoy the motorcycle as a small child thanks to its stability and few scares on it. This chassis designed conscientiously and proven in many circuits is the ideal for tall people, no longer vetoed the sport for the shortest. With this bike any pilot of more than 1.80ctmos goes comfortable in it. In addition, this year with the high ribs compared to the first version, we corrected and improved the bikes.

MTR ZS155 engine.
MTR ZS155 engine in its latest version with internal oil filter and light magnetic plate.
It offers a more comfortable and relaxed driving, while more effective. The yx160 engine adds an extra torque in low and medium speed thanks to its lightweight magnetic plate and its perfect internal measures that help to get better out of the corners when opening gas. A powerful engine.

Brake Kit: double piston of great dimension with bigger brake discs floating of 220mm front and 190mm the rear one.

Tires.
Alloy wheels LIGHTS of 5 sticks of less weight and an exact measurements for the motard more than contrasted, 3.00" rear and 2,5" the front, made in MTR.

Design. Our incredible striking design for end users.
