Brakes performance OVERMAD : Front radial brake formula

Front radial brake formula

The new Radial Formula Braking System 4 Pistoncini uses an innovative patented last generation piston.

A longer life of the gaskets, combined with an increase in performance, bring a step forward compared to other traditional pumps on the market.

Developed together with professional pilots, it becomes a new point of reference for the pitbike racing sector.

The Formula braking systems guarantee perfect sliding of the pistons to offer the rider maximum modulability.

This clamp can be mounted on forks with standard attachment as:

- Paioli
- Marzocchi
- Fastace
- DNM
- K2
- K1
- Tech
- SHOWA HONDA CRF 150

TECHNICAL FEATURES:

Front Pump

- Machined pump body SLC
- Hard anodized piston of Ø 9.75 mm

Porthole for checking the oil level
Forged lever with integrated TFRA

Front Caliper

SLC monolithic work clamp body
Radial attack
4 pistons of Ø 24 mm
