Spare parts Battery : Battery 24V 2Ah

Battery 24V 2Ah

24V 2Ah lithium battery designed for our 12-inch bicycles, compatible with models manufactured before 2025. It stands out for its excellent autonomy, allowing longer rides with stable and efficient performance. Thanks to its lithium technology, it offers reduced weight compared to traditional batteries, improving maneuverability and riding comfort. Ideal as a replacement or upgrade for those seeking reliability, durability, and better performance for their bicycle.

Compact, lightweight format with excellent performance. Increase your vehicle’s autonomy and reduce its weight immediately!!

Provides high power, long lifespan, environmentally friendly operation, and contains no corrosive liquid.

Features protection against battery overcharge, over-discharge, overcurrent, short circuit, automatic balancing charge recognition, and an integrated protection circuit.

Does not include an external charger, therefore we recommend purchasing a lithium-specific charger if you do not already have one.

Specifications

Nominal voltage (V): 24V

Nominal capacity (Ah): 2Ah

Recharge cycles: More than 1000 cycles

Operating temperature: -10°C to +60°C (Do not exceed these temperatures)

Dimensions: 270 × 120 × 90 mm

Weight: 2 kg
