BRAKE DISC GALFER : Brake disc GALFER rear 3 hole

Brake disc GALFER rear 3 hole

Brake discs "Disc Wave®" represent the best expression of work in research and development by GALFER. Laser cut from high carbon stainless steel, they represent the direct application of a high competition technology available to any user. They replace the original discs without the need for adaptation or manipulation.

Among its improvements we highlight:
- Less weight of unsprung masses.
- Greater braking power.
- Higher heat dissipation capacity.
- Excellent corrosion resistance.
- Less tendency to deformations.
- Keeps the contact surface disc-pickup cleaner.
- Improves and personalizes the aesthetics of the motorcycle
- Stainless steel core (AISI 420).
