OIL : Oil sintetic XFRONT ANTIFRICTION 10W40

Oil sintetic XFRONT ANTIFRICTION 10W40

XFRONT has developed the best possible ANTI-FRICTION oil for our 4-stroke pit bike engines thanks to the best European oil manufacturer.

It is a lubricant that uses high quality synthetic technology and the latest additives on the market. This Precise selection and recipe of raw material results in a very high performance lubricant for the latest generation of four-stroke motorcycle engines.

Specially designed to meet the highest demands, it guarantees excellent performance in terms of mileage, protection against premature wear, lubricant savings, protection against high temperatures, high cleaning power, etc.
It is a general purpose lubricant unless this viscosity is required and the manufacturer objects. The manufacturer's instructions on recommended lubricants always apply.

Properties
- Designed to provide comprehensive protection against wear and friction.
- Excellent engine cleaning properties.
- Good operation at low temperatures facilitates cold starting.
- Excellent protection against high temperatures
- Provides excellent results in terms of acceleration values.
- Excellent protection for clutches and transmissions.
