ENGINE : Crossfire 49cc engine

Crossfire 49cc engine

The automatic 2-stroke engine for the **MTR Crossfire** delivers 49cc of power with performance of up to 12HP, providing an exciting and safe riding experience for young riders. Its air-cooling system ensures efficient, stable, and reliable operation even during extended use.

Thanks to its automatic transmission, children only need to focus on accelerating and enjoying the ride, making learning and handling easy from the very first moment. It also features an adjustable speed limiter, allowing the power to be adapted according to the child's age and experience, offering greater control and peace of mind for parents.

Its lightweight and easy-to-handle design makes it the ideal choice for getting started in junior motocross. Recommended for children aged 5 and up, it combines high performance, quality, and safety in one engine.

Compatible with other similar models on the market, making it a versatile and practical option both for replacement and performance upgrades.
