ELECTRIC BICYCLES PARTS : Control panel for 36V electric bicycle

Control panel for 36V electric bicycle

Display panel for 36V electric bicycles with a 4-wire system, designed to provide multifunctional auto-adjustment and an intuitive, efficient user experience. This panel allows you to view essential information such as battery level, speed, assistance mode, and the overall system status, facilitating precise control during riding. With its 4-wire configuration, it ensures a stable and secure connection with the bicycle's controller, optimizing motor performance. Its compact and durable design makes it ideal for daily use, offering long-lasting durability, easy installation, and clear visibility in various lighting conditions.
