# TOYS : ESHARK PRO 24" Electric Bicycle

ESHARK PRO 24" Electric Bicycle

The HP126E 24" ESHARK PRO is a next-generation e-bike designed to deliver power, durability, and control across all types of terrain. Its 6061 aluminum frame with a proprietary tube design ensures both lightweight construction and high durability, while the 1500W brushless motor provides smooth and efficient power delivery thanks to sine wave control technology.

Equipped with a 48V 10Ah battery, advanced FASTACE suspension, and TIM hydraulic brakes on both front and rear wheels, this bike is built for demanding off-road use. Its three-speed mode system allows riders to switch from beginner to advanced and sport riding modes, reaching speeds of up to 50 km/h.

Its ergonomic pitbike-style design, combined with 24” FAT KENDA tires, makes it an ideal choice for users seeking power, stability, and fun on any terrain.

**FEATURES:**

High-strength 6061 aluminum frame 48V 1500W brushless motor with thermal protection 48V 10Ah lithium battery (18650 cells) Top speed up to 50 km/h 3 riding modes (training / advanced / sport) TIM hydraulic brakes front and rear Adjustable double crown front suspension FASTACE rear air-adjustable shock absorber 24” KENDA FAT off-road tires Sine wave controller for improved efficiency WUXING DZ40 display Pitbike-style design with CNC reinforced seat support Hub drive transmission system Maximum load capacity: 80 kg
