KIDS PIT BIKES : MTR ktm 50cc XL air cooled

MTR ktm 50cc XL air cooled

In MTR already achieved what all parents looking for their children, a 2-stroke minibike nice quality and a great price, and also with this version for older children as they assemble wheels 14 front and 12 rear as the normal pit bikes, which may be used for all ages without any paste.

Do enjoy both your son and yourself with this fantastic bike you will not find anywhere with these qualities. We have taken a deep study on this model as demanded by parents, modifying and deleting the problematic parts and improving model quality and finish, such as an inverted forks quality, better tires and larger brakes as many of the pit bikes as well as safety features like chainguard integrated to avoid accidents.

Additionally, this model now assemble all parts pit bikes like the big tire, so you do not run into problems of spare parts, now you can find all the parts you need and that are equal to their older sisters pit bikes, not as happened before it was required only to make original pieces which did not fit with the possibility of any enhancement or modification to the bike.

Now you can enjoy a great minicross for your child without worrying about problems, with all the new elements that we incorporate. The highest quality and with a new engine to 12cv, limitable easily to the speed you want for your child. Easy to use and light weight makes it ideal for children from 5 years.
