SUPERMOTARD : Rims supermotard overmad 17 ktm

Rims supermotard overmad 17 ktm

Generic 17" supermotard wheels for KTM motocross bikes. Rear wheel 5" and front 3.5", ideal for supermotard use on track. Convert your dirt bike for asphalt now with the best offer on the market and high quality.

We do not recommend fitting tires larger than 150 for the rear wheel and 120 for the front wheel.

7075 aluminum rims, Honda-style alloy hub replica, stainless steel spokes—push your bike to the limit in every corner. With these wheels, you'll enjoy great performance at a low price.

Front axle: 25–30 mm
Rear axle: 20 mm

Sprocket: 520 x 46 teeth

Rear disc: original 220 mm
Front disc: oversized FLOATING 320 mm

Spacers are not included; these must be custom-made once the wheels are mounted. These are generic wheels, so the hub is not a KTM copy, and custom spacers are required for installation.
